The V3 is an ultra slim, high-throughput kiosk platform for express self check-in, self-tagging and airside passenger transit services. Available in an array of purpose driven configurations, the V3 can perform core self service activities, ancillary purchases or be utilized as a high-capacity boarding pass and bag tag print station partnered with web and mobile check-in. Available with biometric options, the V3 is truly next-generation, ready to deliver in the terminal of today and tomorrow.

OTHER MODELS

VELOCITYtag

The Vtag is a variant of the V3 designed for express, high-throughput self tagging and/or boarding pass printing. With the ability to hold over 4,000 full sized bag tags, the Vtag provides continuous operation with the minimal agent intervention and is the ideal partner to automated self bag drop. Utilizing a compatible application, passengers with web or mobile check-in, can also use barcode or NFC/RFID on the Vtag for direct, instant printing for further efficiency gains.
